Grade 6E2-Lesson 7.3

Step 2 Make a table.

Use the equation $a = 126b$ to make a table of values. Place the independent variable in the first column, and the dependent variable in the second column.

Number of Bushels, *b*	Number of Apples, *a*
0	
1	
2	

Step 3 Use the values to make a list of ordered pairs.

(b, a)
