- A. can't say a word. B. want to say something hard.
C. find it hard to say yes. D. find it hard to express your opinion on something.

III. READING

Read the following passage and circle the letter A, B, C, or D to indicate the correct answer to each of the following questions.

Pollution can be seen not only throughout the world, but also in our own homes. It comes from household chemicals, the amount of water people use and the waste people produce and throw away. What can be done to stop this pollution? Surprisingly, a person can help save the environment by doing simple things.

First, we need to recycle, which allows products to be used over and over again. Recycling can also reduce the number of trees cut down to produce paper products. **It** takes very little effort. It is not hard to place plastic and glass bottles, aluminum cans and paper in a bin. Anyone can do it.

Second, we need to watch the amount of water used at home. It can be conserved by taking short showers instead of baths, repairing leaky faucets, using the dishwasher or washing machine only when fully loaded, or simply turning the faucet off while brushing your teeth.

If we do our part in our own homes, we can help keep the planet from becoming more polluted.

25. Pollution is caused from the following sources except _____.

- A. water in rivers B. water from households

IV. WRITING

Use the words / phrases given to make meaningful and correct sentences. You can add some more words or make some changes.
