Pros and Cons of Social Media

Social Media has many advantages. First, its sites are the most effective way to keep in touch with your friends, classmates, and relatives. These sites allow you to send and receive messages and upload photos or videos. They are very interactive. You get to see what your friends and relatives are up to. Second, you can meet and get to know a variety of people of different cultures and places. You can interact with a lot of people at the same time and spread your thought and interests across the world.

However, social media can cause identity theft and fraud. Your personal information can be stolen. Information like your e-mail address, name, location, and age can be used to commit online crimes. Cyberbullying is a huge cause for concern. Social networking sites are poorly managed, so it can be easy for someone who might try to hurt you. They can spread lies among your friends, steal, and use your photos, or send unfriendly messages.
