

Mr. Ramos drove 235 km from home to the airport. He returned by another route that was 42 km 100 m shorter. What was the total distance that Mr. Ramos traveled?

Convert the following:

$$\begin{array}{rcl} 235 \text{ km} & = & \text{m} \\ 42 \text{ km } 100 \text{ m} & = & \text{m} \end{array}$$

$$235,000 \text{ m} - 42,100 \text{ m} = \text{m}$$
