## Practice 3   Addition: Comparing Two Sets to Add

Solve. Use models to help you.
1.   102 children are not using floats at a swimming pool.
     There are 23 more children using floats than children
     not using floats.
     How many children are using floats?

     not using floats [102] [23]

     using floats [?]

 $102 + 23 = \boxed{}$

     _____ children are using floats.

2.   Shop A sold 97 television sets.
     It sold 166 fewer television sets than Shop B.
     How many television sets did Shop B sell?

     97   166

     Shop A [   ]

     Shop B [   ]
                  ?

     $\boxed{} \ \boxed{} \ \boxed{} = \boxed{}$

   Shop B sold _____ television sets.

RS/2March22/WB2Apg61 d Problems: Addition and Subtraction

3. Siti folded 123 paper cranes.
Hani folded 87 more paper cranes than Siti.
How many paper cranes did Hani fold?

123   87

Siti

Hani

?

◯ ◯ ◯ = ◯

Hani folded _____ paper cranes.

4. 234 choir members took part in a parade.
There were 159 fewer choir members than dancers at the parade.
How many dancers were at the parade?

234   159

Choir
members

Dancers

?

◯ ◯ ◯ = ◯

_____ dancers were at the parade.

62
