Music is my first \_\_\_\_\_. In fact, I'd say it's time-consuming passion as I \_\_\_\_\_ much longer playing the synthesizer or the guitar than \_\_\_\_\_ for my classes. I have always dreamed of becoming a good performer, either as a band player or playing \_\_\_\_\_. My parents wanted me to study classical \_\_\_\_\_, as a very good girl should do, but from my teens on I followed my real \_\_\_\_\_, which is playing lighter music and improvising.

Fortunately, since I went to the university, I've been able to fulfill part of my dream. I met three \_\_\_\_\_ as crazy about music as me and we began playing in the garage of my house. My mum was horrified at the idea of having to put with heavy metal or rock \_\_\_\_\_ at home, but the music we play sounds much softer than that and to my surprise she soon got used to it.

Next year we're going to try and \_\_\_\_\_ a single or a CD. For the time being we feel quite happy just to perform in \_\_\_\_\_ and pubs.

Sometimes we are hired for \_\_\_\_\_ and it's great fun because besides playing for \_\_\_\_\_ people, we can get involved in the party and eat superbly.
