Pair of shoes

I saw a really nice pair of shoes in the city center today. I saw them in the big department store opposite the Town Hall. They were brown with a beige line around the bottom. I tried them on and they were really comfortable. The only problem is the price, that's why I didn't buy them. They cost 110 euros! I think that's much too expensive for a pair of shoes. The last pair I bought cost me 85 euros and I thought that was expensive. It's my birthday next Thursday. I wonder if my parents might give me some money for the shoes. They gave me 50 euros last year. If they give me the same this year I'd only have to pay 60 euros for the shoes.

1. Where did the man see the shoes?
    A. A big department store in the city center
    B. A small department store in the city center
    C. Online

2. What color were the shoes?

A. Brown and white
B. Brown and beige
C. Brown and black

3. How much do the shoes cost?

A. 85 euros
B. 50 euros
C. 110 euros

4. When's the man's birthday?

A. Next Monday
B. Next Thursday
C. Next Tuesday

5. How much money did the man's parents give him last year for a birthday present?

A. 85 euros
B. 50 euros
C. 110 euros
