

$$\begin{cases} 3x + 5y = 15 \\ 2x + 3y = -10 \end{cases} \Rightarrow \begin{cases} 6x + \boxed{} y = \boxed{} \\ \boxed{} x - 9y = \boxed{} \end{cases} \Rightarrow$$

$$\Rightarrow \begin{cases} 6x + \boxed{} y = \boxed{} \\ \boxed{} x - 9y = \boxed{} \end{cases} \Rightarrow y = \boxed{}$$

$$2x + 3 \cdot \boxed{} = -10$$

$$2x + \boxed{} = -10$$

$$2x = -10 - \boxed{}$$

$$2x = \boxed{}$$

$$x = \boxed{} : \boxed{}$$

$$x = \boxed{}$$

Ответ: ($\boxed{}$; $\boxed{}$)
