

PHẦN 12: HOÀN THÀNH VĂN BẢN

Chọn 01 cụm từ hoặc câu trong 04 lựa chọn cho sẵn trong mỗi câu hỏi để điền vào chỗ trống tương ứng trong bài luận đã cho. (56-60)

It is often argued that nuclear power offers an unlimited and “clean” source of energy.
(56) _____.

First, nuclear plants can never be made fully safe. As they get older and less reliable, they become unstable and leakages can occur. (57) _____.

(58) _____ is that the technology is the same as that used for nuclear weapons, which could make plants vulnerable to terrorist attacks and lead to a dangerous proliferation of nuclear weapons.

(59) _____. The dangers associated with “safe” storage over such a long period are unknown, but it is unlikely that there could ever be complete protection from the threat of earthquakes. Are we not just dumping our problems onto the future generations?

(60) _____. We need to develop further renewable and efficient sources of energy using the sun, the wind and the sea. Some countries have made a good start in this direction, but most have done far too little.

56.

- A. In fact, the benefits nuclear power brings about outnumber its downsides
- B. However, despite some attractions, on balance the disadvantages outweigh the advantages
- C. Therefore, there are far more drawbacks of operating nuclear power plants than perks
- D. Yet, it can't be denied that people nowadays cannot live without electricity from nuclear power

57.

- A. Also, earthquakes, destructive geological events, always happen and it may lead to serious leakages and aftermaths
- B. Also, as there may be serious danger of leaks and contamination for miles around, which can last for decades, it is compulsory that an earthquake be prevented at all costs
- C. Also, if there is a geological event such as an earthquake, there is a serious danger of leaks and contamination for miles around and a toxic aftermath which can last for decades
- D. Also, the prevention of earthquakes and other geological events from happening may help protect the nuclear power leakages and aftermaths

58.

- | | |
|---------------------------|-------------|
| A. Another safety concern | B. Secondly |
| C. One more | D. Next |

59.

- A. Next, the main reason why nuclear power is unattractive, is the problem of radioactive waste and the need to store it underground until it no longer poses a threat, which could be hundreds of thousands of years
- B. Next, the main point is that nuclear power is unattractive, and the problem of radioactive waste is serious as it can take hundreds of thousands of years for the such waster to decompose
- C. Last but not least, the most important issue of using nuclear power is to prepare storage places for radioactive waste until it no longer poses a threat, and so that we can use it for hundreds of thousands of years
- D. Last but not least, we should make use all of the nuclear power instead of storing them underground for hundreds of thousands of years to decompose so that it is no longer risky

60.

- A. In a nutshell, nuclear combined with wind and solar powers can be a sustainable solution to the energy crisis
- B. To sum up, I feel the issue of waste is probably the main argument against nuclear power and the reason why we need to think of alternatives
- C. In a nutshell, I think each citizen's carbon footprint is the first thing that needs to be mitigated, unless you want the governments to build more nuclear power plants
- D. To sum up, I think everyone should cut down on the energy they use to help save the natural resources

PHẦN 13: TỰ LUẬN

61. **Viết một văn bản khoảng 250 từ về chủ đề sau:**

In recent time, getting online or playing games on smartphones is becoming more popular among teenagers than reading books. Why is this the case and what can be done to promote the reading habit of young people?
