

Watch the video.

Fill in the blanks with the words from the box.

Lines go on in both directions.

intersect

When we have two lines, this is called .

a pair of lines

Sometimes, a pair of lines will or cross at a point. We call these lines. Intersecting lines form an angle.

forever

perpendicular

When intersecting lines meet at (90°), they are called lines.

intersecting

a right angle

Some lines never meet. They always stay an equal distance apart. They are called lines.

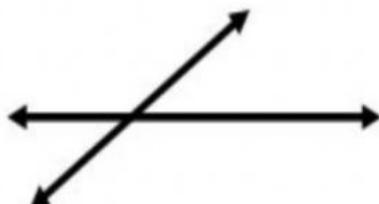

parallel

Copy the text in your notebook. Memorise it.

Classify whether pairs of lines are parallel, perpendicular and intersecting.

1.

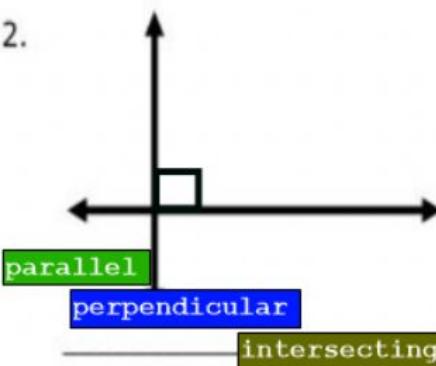

parallel

perpendicular
