

Name: _____

Date: _____

Class: _____

Mammals

Mammals are a group of vertebrate animals that live on land, at sea, in the air and under the ground. Mammals are warm-blooded. They have hair or fur on their bodies. Most mammals give birth to live young and feed their young with milk. Mammals have lungs for breathing air. Mammals that live in water do not have gills like fish do. They must come to the surface regularly to breathe in oxygen. Some mammals such as Spiny anteater and platypus reproduce by laying eggs.

A) Can you name some examples of Mammals?

- Drag and match the pictures with their corresponding name.

Polar Bear	Racoon	Zebra	Cheetah	Dolphin
Bat	Hedgehog	Platypus	Rhinoceros	Kangaroo

B) Choose the correct answer.

- Mammals are _____ blooded.
- Mammals breathe in oxygen using their _____.
- Mammals live at sea, under the ground, in the air and on _____.
- Mammals have hair or _____ on their bodies.
- Mammals give birth to _____ young.
- Mammals nurse their young with _____.
- The only mammal that can fly is _____.
- Mammals that lay eggs are _____.
- The largest land mammal is the _____.

**Can you guess what is the
biggest mammal in the world?**
