

Reading UNIT 7 - PART 2: SKILLS DEVELOPMENT

Rearrange the sentences to make correct order.

Read the questions first. Think about synonyms and how you could paraphrase the statements. This will help you identify the answer. Saying each statement in your own words can help do this.

Read the instructions carefully.

Quickly skim the reading text to try to understand the general meaning of the text.

Check back with the question statement and mark answer if correct. If not, move on to other paragraphs.

Scan the text paragraphs you think might contain the answer for synonyms. If you find a possible answer underline it.

Read the question statements again and predict which paragraph contains the answer.
