Telepathy is the ability to communicate information using your mind. Information is transmitted from one minds to another using means other than your well-known perceptual senses. Telepathy ranges from the basic reading of minds to more intense power, such as implanting or disrupting thoughts in other people's minds.

There are a few common reasons why someone become telepathic. For example, there are those who are simply born with a sense of knowing. These people talk about seeing spirits. But they tend to suppress abilities as children and often lose it as adults. Alternatively, a life-changing event may open them up to being telepathic and exploring their gift even further.

Also, there are times when a near-death experience or serious accident can also open someone up and cause a telepathic awakening. And in some cases, hypnosis or healing sessions can help a sixth sense to awaken. Such sessions help with getting energy flowing and causing a shift in awareness and consciousness.
