

Cytoplasm

Holds the shape and structure of the cell

Vacuole

Allows substances to pass in to and out of cell.

Cell Wall

Contains Genetic Information

Jelly-like substance where chemical reactions occur

Contains dissolved sugars and salts.

 **LIVEWORKSHEETS**

1.

Nucleus

Allows substances to pass in to and out of cell.

Cell Membrane

Holds the shape and structure of the cell.

Chloroplast

Contains genetic information.

Contains chlorophyll for photosynthesis.

Contains dissolved sugars and salts.
