MATHEMATICS

FIND THE L C M OF THE FOLLOWING NUMBERS

To find the L C M of numbers you first write down some multiples of the given numbers and then find the LCM. Remember the L C M is just one number.

1) Find the LCM of 3 and 5. Ans = _____

2) What is the L C M of: 4 and 5? Ans = _____

3) Find the L C M of the following numbers: 4, 5, 10. Ans= _____

4) Find the LCM of 6 and 5. Ans = _____

5) What is the L C M of: 3, 6, 8? Ans= _____

6) What is the L C M of: 2, 3, 6? Ans= _____

8) Find the LCM of 4, 5, 6. Ans= _____

9) Find the LCM of 2, 3, 4, 6. Ans= _____

10) What is the L C M of: 6, 12? Ans= _____

11) What is the L C M of: 12 and 15? Ans= _____

12) Find the LCM of 7 and 6? Ans= _____
