

4.E.3A.3 Navigational Instruments Indicator Assessment

Name: _____

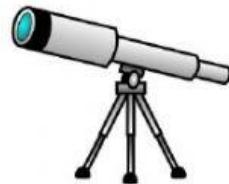

Use the pictures below to answer questions 1-4.

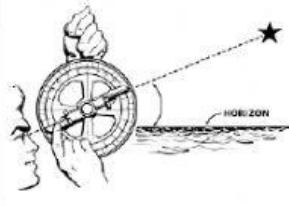

Instrument A

Instrument B

Instrument C

Instrument D

1. Which instrument above shows an image of a sextant?

- A. Instrument A
- B. Instrument B
- C. Instrument C
- D. Instrument D

2. Which instrument above shows an image of a telescope?

- A. Instrument A
- B. Instrument B
- C. Instrument C
- D. Instrument D

3. Which instrument above shows an image of an astrolabe?

- A. Instrument A
- B. Instrument B
- C. Instrument C
- D. Instrument D

4. Which instrument above shows an image of a compass?

- A. Instrument A
- B. Instrument B
- C. Instrument C
- D. Instrument D

5. Which tool makes faint, faraway objects seem brighter and closer.

- A. Astrolabe
- B. Compass
- C. Sextant
- D. Telescope

6. Which ancient astronomical instrument is used for solving problems relating to time and the position of the Sun and stars in the sky.

- A. Astrolabe
- B. Compass
- C. Sextant
- D. Telescope

4.E.3A.3 Navigational Instruments Indicator Assessment

7. The navigational instrument that shows direction in a frame of reference that is stationary relative to the surface of the Earth is known as a(n) _____.

- A. Astrolabe
- B. Compass
- C. Sextant
- D. Telescope

8. The scientific instrument that is used to measure the angle between any two visible objects is known as a(n) _____.

- A. Astrolabe
- B. Compass
- C. Sextant
- D. Telescope

9. On a compass, the large letters N, E, W, and S are known as _____.

- A. Ordinal directions
- B. Daytime directions
- C. Cardinal directions
- D. Sundial directions

10. What navigational tool is commonly used to view Polaris at night?

- A. telescope
- B. sextant
- C. astrolabe
- D. compass
