Question 26. A. good B. harmful C. clear D. clean

Question 27. A. Thermal B. Water C. Land D. Air

Question 28. A. Thermal B. Water C. Land D. Air

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions.

Indonesia is a group of islands, located between Asia and Australia. It is close to the equator, so it never gets cold. Every day, the temperature is between 21°C and 32°C. Indonesia is covered with tropical rainforests. For many years, Indonesians have used wood to build their

homes. Most of the old houses have wooden frames, walls and floors. Local people have cleared land for farming, and loggers have cut down miles of trees to sell the wood to other countries. Now there is a serious shortage of trees.

Nowadays, in Indonesia's rural areas, many of the houses are built on stilts. They raise the houses up, keep the living area off the wet soil, and also keep the houses from flooding during the rainy season. Some people still live in houses with only one room, and some of these houses do not have electricity or running water, but they cannot afford to improve their housing.

Because of its location, natural disasters such as floods, droughts, earthquakes and forest fires frequently occur, which destroys buildings and leaves people homeless. These disasters affect people both in the city and in the country.

Question 29. What have Indonesians used wood for ?

- A. building houses
- B. cooking
- C. farming
- D. All are correct

Question 30. Are there many trees in Indonesia ?

- A. Yes, there are
- B. Yes, it is
- C. No, there aren't
- D. No, there isn't

Question 31. How are many of the houses in Indonesia's rural areas nowadays?

- A. building on stilts
- B. keep off the wet soil
- C. keep from flooding
- D. all are correct

Question 32. Which natural disaster usually occurs in Indonesia ?

- A. flood and drought
- B. earthquake
- C. forest fire
- D. A, B and C

Section B (2,0 points)
