HOSPITAL

Hospital is a health care institution. A hospital is a place where a person goes to get healing when he or she gets sick or injured. Doctors and nurses work in the hospital. To avoid from getting sick, we have to keep our body healthy. We can consume nutritious foods and do the exercises regularly. We also have to stay away from anything that can get us sick. If we get sick, go to the doctor and take medicine. Taking enough rest will also be good to recover our body health.
