

The figure shows three multiplication problems on a grid, each with a corresponding colored area model.

Problem 1: $4 \times 5 =$. The area model is a pink rectangle that is 4 units high and 5 units wide, representing the product 20.

Problem 2: $9 \times 2 =$. The area model is a blue rectangle that is 9 units high and 2 units wide, representing the product 18.

Problem 3: $6 \times 3 =$. The area model is a green rectangle that is 6 units high and 3 units wide, representing the product 18.

6	X	3	=
