Measuring Capacity using millimetres (ml) and litres (l)

The containers shown below are all filled to maximum capacity. Their contents are all poured into the measuring cups or cylinders shown on the right.

1. **In each case, what is the capacity of the container in ml?**

   Click on the drop-down arrow [v] to the right, then select your answer.

2. **Which bottle has the greatest capacity?**

3. **What is the capacity of bottle C in litres and metres?**
