THE THIRSTY CROW

It was summer, One hot day, a thirsty crow flew all over the fields searching for water for a long time, she could not find any. She felt very weak, almost giving up hope.

Suddenly, she saw a water pot below her. She flew straight down to see if there was any water inside. Yes, she could see some water inside the pot!

The crow tried to push her head into the pot. Sadly, she found that the neck of the pot was too narrow. Then she tried to push the pot down for the water to flow out. She found that the pot was too heavy.

The crow thought hard for a while. Then looking around her, she saw some pebbles. She collected the pebbles one by one, dropping each into the pot.

As more and more pebbles filled the pot, the water level kept rising. Soon it was high enough for the crow to drink. Her plan had worked!
