### Facebook smart glasses – level 3

15-09-2021

#### Fill in the missing verbs:

Facebook \_\_\_\_\_ its first smart glasses on Thursday in a step toward its goal of offering true **augmented-reality spectacles**.

The social media giant is the latest company to try to make video glasses go **mainstream**. The company \_\_\_\_\_ its first pair of smart glasses that \_\_\_\_\_ wearers to capture photos and short videos from their point of view and to easily post them on Facebook, Instagram, or WhatsApp. Users can also \_\_\_\_\_ to music and podcasts, as well as \_\_\_\_\_ calls.

According to Facebook's founder and CEO Mark Zuckerberg, Facebook \_\_\_\_\_ to build **best-in-class** glasses, and therefore they \_\_\_\_\_ the popular Ray-Ban frames that people already \_\_\_\_\_. Zuckerberg \_\_\_\_\_ that users wouldn't have to choose between **interacting** with the device or the world around them anymore.

Google launched its Google glass in 2013; however, they \_\_\_\_\_ it in 2015. That's why Facebook \_\_\_\_\_ up with Ray-Ban to make its model look more fashionable and address privacy measures by including an LED light that \_\_\_\_\_ when the glasses \_\_\_\_\_.

## NEWS IN LEVELS: Facebook smart glasses

### Difficult words:

**mainstream** (something that many people think is normal)
