Energy Transformation

Energy transformation is the change of energy from one form to another. Another name for energy transformation is **energy conversion**.

Examples:

<u>Light Bulb</u> - Electrical Energy to Heat and Light Energy <u>Eating before a playing a game</u> - Chemical potential energy to Kinetic and Heat energy

Drag the pictures below to the energy transformation being described.

| Gravitational potential energy to Kinetic energy | Electrical energy to Sound and Heat Energy |
|--|--|
| | |
| | |
| | |
| Electrical energy to Kinetic and Heat energy | Chemical potential energy to Heat and Light energy |
| | |
| | |
| | |

| Chemical potential energy to Kinetic, Sound, Light and Heat energy | Electrical energy to Heat and Sound energy |
|---|--|
| | |
| | |
| Electrical energy to Heat energy | Electrical energy to Light, sound and Heat energy |
| | |
| | |
| Kinetic energy to Sound energy | Chemical potential energy to Heat and Light energy |
| | |
| | |
