Full name:
Class:

1 The Beach

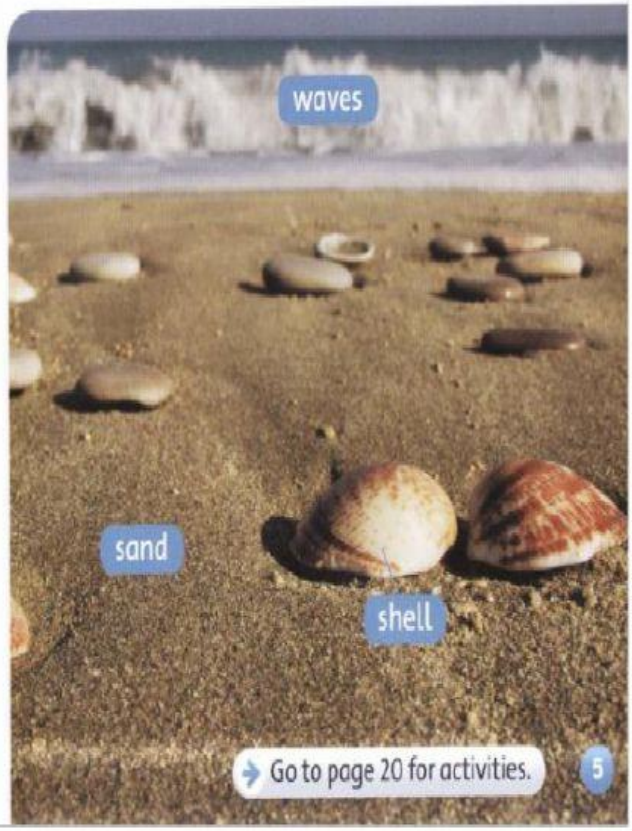

Every day the ocean goes up the beach at high tide, and it goes down the beach at low tide.

The ocean moves with the wind, too. The wind makes waves. The ocean is salt water. It's big and strong.

The ocean can break rocks and shells into pieces. The pieces of rock and shell hit the water and other rocks. Then they get very little. This is how the ocean makes rocks and shells into sand.

Go to page 20 for activities.

LIVEWORKSHEETS

1 The Beach

Read pages 4–5.

1 Match.

1 The ocean	is little pieces of rock and shell.
