I. Write the energy sources from the box under the correct pictures.

natural gas | solar | wind | oil | biogas | coal | nuclear | hydro

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

II. Fill in the blanks with the sources of energy in part I.

1. _____ energy comes from the heat of the sun.
2. _____ can be produced by dead plants and animals as they decay.
3. _____ is often found in the ground, consisting mainly of methane (CH_4).
4. _____ energy is energy that comes from the force of moving water.
5. _____ is flammable black hard rock, used as a fossil fuel.
6. _____, commonly known as petroleum, is the largest source of energy in the United States.
7. To produce _____ energy, atoms are split apart, which releases energy.
8. _____ energy is produced from moving air with the help of large turbines.

III. Complete the sentences with the words from the box.

renewable | non-renewable | abundant | alternative | polluting | exhaustible | fossil | available

1. Many of the earth's natural resources are _____, which means they are available in limited quantity and can be used up.
2. Oil is a relatively _____ but is a non-renewable resource.
3. _____ fuels, including coal, oil and natural gas, are currently the world's primary energy source.
4. _____ resources are those which cannot be replaced once they are used up.
5. _____ energy is any energy source that can replace fossil fuel.
6. Despite being the most _____ source, coal still plays an important role in the production of electricity.
7. Solar power from the sun is _____ as we won't "use up" all the sunlight from the sun.
8. Geothermal energy is non-polluting, but is not widely _____.
