Question 2. His family name is Metcanfe.

A. True B. False

LIVEWORKSHEETS

Question 3. To join a club, he has to fill in the form online with the help of the administrator.

A. True B. False

Question 4. The administrator asks some questions, except health problems.

A. True B. False

VIII. Read and choose the best answer

The Amazon rainforest is the largest tropical rainforest in the world. Amazingly, over one third of the world's animal species live there, and many of them are only found in the Amazon. Let's meet some of the animals!

Hyacinth Macaw

The Hyacinth Macaw is the largest parrot by length in the world. It is 100 centimeters long from the end of its tail to the top of its head. Its body is covered with beautiful blue feathers.

Amazon River Dolphin

The Amazon river dolphin is commonly known as the "pink dolphin" because of its pink skin. It looks pink because its blood vessels are very close to the surface of its skin. It is considered the smartest of the river dolphins. Its brain size is 40% larger than that of humans!

Golden Lion Tamarin

The golden lion tamarin is a small monkey that has bright, reddish-orange hair around its face. Its hair makes it look like a little lion. It moves its nest frequently so that predators can't find it. Its slender arms and legs, sharp claws, and long tail help it live in the trees.

Poison Dart Frog

Ranging from 1.5 cm to 6 cm in length, the poison dart frog is very tiny. But its bright, colorful skin is poisonous. If a predator tries to eat the frog, the poison will paralyze the predator almost instantly. Unfortunately, many animals in the Amazon, including the examples above, are endangered. Some of them have lost their habitats because of deforestation, while others have been hunted for their beautiful fur. If we want to see these amazing animals in the future, we must protect the Amazon rainforest.

1. What is this passage mainly about?

a. predators and their prey

b. deforestation in the Amazon

c. various plant species in the Amazon

d. the Amazon's amazing animals and their features

2. Which is NOT true about the Hyacinth Macaw?

a. It lives only in South America.

b. It is hunted for its beautiful fur.

LIVEWORKSHEETS

c. It is covered with beautiful blue feathers.

d. It is the largest parrot in the world by length.

3. Which is NOT one of the conditions that help the golden lion tamarin live in the trees?

a. sharp claws b. slender arms and legs

c. long tail d. reddish orange hair Inference

4. What can be inferred from this passage?

a. Amazon river dolphins are the smartest animals.

b. Many animals will disappear if deforestation continues.

c. Poison dart frogs can't kill animals that are bigger than them.

d. The golden lion tamarin will eat meat because of deforestation.

5. Which can replace the word "instantly" in line 28?

a. immediately b. interestingly c. slowly d. strangely
