IX. Read the passage carefully and choose the correct answers.

1. Passage 1.

NATIVE AMERICANS

Native Americans have been living in what is now the United States of America since long before any Europeans came. They are not just a single group of people - there are many different tribes of Native Americans. Different Native American groups have different languages, religious believes, and ways of living, or folkways.

The Hopi are Native Americans who come from what is now the American Southwest. When the Spanish came to America in the 16th century and found the Hopi people, they nicknamed them "pueblo people" because Hopi people didn't move around much - they lived together in what amounted to towns. Pueblo is a Spanish word that means "town." The Hopi have always been a very peaceful people. Their name comes from the term Hopituh Shi-nu-mu, which means, in the Hopi language, "The Peaceful People" or "Peaceful Little Ones."

The Navajo come from the same general area as the Hopi. But instead of staying in one place, they moved around. They didn't live in permanent towns like the Hopi. They

were a "semi-nomadic" people. While the Hopi were historically known for farming, the Navajo were known for hunting and gathering. After they met the Spanish, the Navajo became known for herding sheep. The Hopi, not so much.

Today, there may not be as many thriving Native American tribes as there used to be, but there are more than a few. All in all, there are about 1,000 different groups of Native American people in the United States, and each group is unique.

81. How long have Native Americans been living in America?

B. There are fewer Native American tribes today than in the 16th century.

C. There are the same number of Native American tribes today as in the 16th century.

D. It is unclear about the number of Native American tribes.

2. Passage 2.

Elephants on the coast of Thailand are acting strange. They stamp their feet and motion toward the hills. The sea draws back from the beaches. Fish flop in the mud. Suddenly, a huge wave appears. This is no ordinary wave. It is a tsunami!

Tsunami waves are larger and faster than normal surface waves. A tsunami wave can travel as fast as a jet plane and can be as tall as a ten-story building. For a tsunami to occur, there must be some kind of force that causes the ocean water to become displaced. Most tsunamis are caused by underwater earthquakes. However, volcanoes, landslides, large icebergs, and even meteorites are capable of causing one of these mighty waves. Tsunamis are extremely powerful. Because tsunami waves are so strong, they can kill people, damage property, and completely ruin an ecosystem in just one hour.

Scientists have no way of predicting when a tsunami will hit. However, if a powerful enough earthquake occurs, scientists can issue a warning or a watch. A warning means that a tsunami will very likely hit soon. A watch means that conditions are favourable for a tsunami. When people are notified about a watch or a warning, they have more time to prepare. It is best not to get caught unaware when a tsunami is on the way!

86. Why are the elephants acting strange?

A. They are not used to seeing fish.

B. They dislike wading into the ocean.

C. They can sense something out of the ordinary.

D. They see the ocean drawing back from the beaches.

87. What is this passage mostly about?

A. How to prepare for tsunamis.

B. Scientists who predict tsunami waves.

C. Similarities and differences between wave types.

D. Causes and effects of tsunamis.

88. Which does not cause a tsunami?

A. earthquakes   **B.** mudslides   **C.** volcanic eruptions   **D.** meteorites

89. Tsunamis cause so much destruction because they   .

A. can be predicted by scientists

B. break on the coast, unlike normal waves

C. are caused by volcanoes, landslides and meteorites

D. can be as tall as a ten-story building

90. We can conclude from the last paragraph that   .

A. a tsunami warning is more serious than a watch

B. a tsunami watch is more serious than a warning

C. a tsunami warning and watch are equally serious

D. a tsunami warning and watch both mean a tsunami has formed
