## II. Read the article and then decide whether the statements are true (T) or false (F).

Telepathy is the ability to communicate information using your mind. Information is transmitted from one mind to another using means other than your well-known perceptual senses. Telepathy ranges from the basic reading of minds to more intense power, such as implanting or disrupting thoughts in other people's minds.

There are a few common reasons why someone becomes telepathic. For example, there are those who are simply born with a sense of knowing. These people talk about seeing spirits. But they tend to suppress their abilities as children and often lose it as adults. Alternatively, a life-changing event may open them up to being telepathic and exploring their gift even further.

Also, there are times when a near-death experience or serious accident can also open someone up and cause a telepathic awakening. And in some cases, hypnosis or healing sessions can help a sixth sense to awaken. Such sessions help with getting energy flowing and causing a shift in awareness and consciousness.
