The researchers say that eating less meat may be the key to keeping a healthy weight. At the start of the research, they asked the participants from 10 European countries, including the UK, to weigh and measure their weight. Five years later, the participants reported their weight. They also filled in a detailed food questionnaire. The researchers conclusion is that meat consumption was associated with weight gain in both men and women.

To lose weight is not easy. Whatever diet we do, we have to remember that exercise, a balanced diet and being happy are the keys to living a healthy life.
