LIVEWORKSHEETS

Chap 8: Protect trees

Some animals and little plants are bad for trees. Animals eat the leaves and bark. Little plants grow around the trunk. Then the tree can't get water. People are bad for trees, too. Cars, fires, and factories can make the air and rain dirty. Then the trees can't grow.
Some people cut down trees. They take wood and they make new things on the land.

Every day people cut down about 10 million trees.
Let's stop this. Let's grow new trees. Let's protect trees!

Question 1: <u>Why</u> are some <u>animals</u> and little <u>plants</u> <u>bad for</u> <u>trees</u>?

_____

Question 2: <u>Why</u> are <u>people</u> <u>bad for trees</u>?

_____

Question 3: <u>How many trees</u> do people <u>cut down</u> every day?
