

1. Write if these characteristics are for **mammals** or for **birds**

All babies drink their mother's milk: *mammals*

Most of them can fly: _____

They are oviparous: _____

Most of them are viviparous: _____

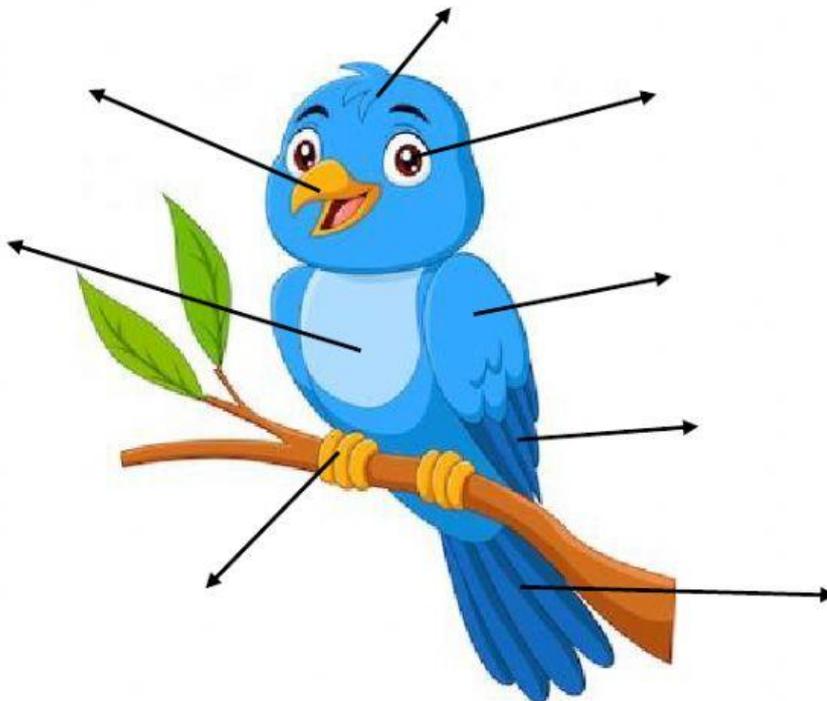

Adults feed their chicks when they are young: _____

They have wings, a tail, a beak and feathers: _____

Most of them have fur or hair to keep them warm: _____

2. Write the name of the parts of a bird

Head Wings Tail Eyes Beak Body Feather Claws

3. Match the definitions to the terms

These animals eat other animals

These animals eat plants

These animals eat both plants and other animals

These animals lay eggs

These animals' babies are born from their mother's womb

oviparous

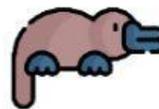

omnivores

carnivores

viviparous

herbivores

4. Match the text with the animal

These animals breathe with their lungs. They live in water. They are viviparous

These animals lay eggs. They have a beak, wings, a tail and feathers. They have light bones so they can fly.

These animals are mammals but they lay eggs. They have fur to keep them warm.

These animals are oviparous. As babies they breathe with their gills, but adults breathe with their lungs. These animals always have wet skin.

Most of these animals are carnivorous, but some are omnivorous (like the turtle). These animals have scales and a hard skin. They can be viviparous (like boas) or oviparous.
