II. Read the text. Fill in each blank with ONE word.

spaceship

footprints

probably

covers

spacesuits

When you walked on sand, you leave (1) behind you. Then the wind comes and (2) your footprints. But there is no wind on the Moon and no rain. There is no air and no weather. So the footprints of the first people on the Moon are still there today.

Those men are famous now. Their names are Neil Armstrong and Buzz Aldrin. They climb out of their (3) and stood on the Moon on 20th July 1969.

They looked around and saw no living things. The ground was dark grey and dusty, and the sky was black. They could see the Earth in the sky. The Earth was blue and white.

Then they started to walk on the Moon. They were in heavy (4) but they could walk and jump easily. They could move six meters with each step. It was easy because everything on the Moon is lighter than on the Earth. Things are lighter because there is less gravity. This is because the Moon is smaller than the Earth.

Armstrong and Aldrin spent only three hours on the Moon, but their footprints will (5) stay there for hundreds of years.
