Adaptation of a Leopard

An adaptation is a special skill which helps an organism (plants or animals) to survive in its environment.

| Body Parts | Adaptations |
|----------------------------------|-------------|
| A - Large round pupils | |
| B - Strong jaw and large canines | |
| C - A Long Tail | |
| D - Yellow fur with black spots | |
| E - Long powerful Legs | |
| F - Semi retractable Claws | |
