

Name: \_\_\_\_\_

Period \_\_\_\_\_

Wind blows \_\_\_\_\_ toward the mountain.

The mountain is in the way and the air can't go anywhere so it must go \_\_\_\_\_

As the air rises, it expands, cools, and the water vapor form clouds that cause \_\_\_\_\_ to fall.

The cloud thickens and rain falls on the \_\_\_\_\_ side of the mountain.

The Winward side of the mountain is \_\_\_\_\_

The air lost all of its water on the windward side of the mountain. When air moves over the mountain

there is no water left and this leaves the other side of the mountain \_\_\_\_\_.

The leeward side of the mountain has a \_\_\_\_\_ like climate
