***Listen to the first speaker and fill the gaps in the following text.***

The plane has been developed by lots of people \_\_\_\_\_ the years, but the Wright brothers certainly made it work and made it \_\_\_\_\_. Planes existed before, people had made aeroplanes fly before, but I always have a huge \_\_\_\_\_ for the inventor who really makes it work; Henry Ford I have the same admiration for because he made a car \_\_\_\_\_, and made it \_\_\_\_\_, and made it work. So the Wright brothers for me are probably the most - should be the most - \_\_\_\_\_ people when it comes to aeroplanes.
