WORKSHEET in MATHEMATICS 4  
Third Quarter  
Week 4 – Day 1-2

Identifies and describes triangles according to sides and angles (M4GE-IIIc-16)

A. Match Column A with Column B.

A

1. Right Triangle
2. Isosceles Triangle
3. Obtuse Triangle
4. Acute Triangle
5. Equilateral Triangle

B

- a. A triangle that has three acute angles
- b. A triangle that has three equal sides
- c. A triangle that has two equal sides
- d. A triangle that has an obtuse angle
- e. One of the measures of the angle is  $90^\circ$

B. Identify the triangles according to sides and angles.

C. Describe each kind of triangle according to sides and angles.

1. Scalene Triangle
2. Equiangular Triangle
3. Right Triangle
4. Isosceles Triangle
5. Acute Triangle
