Name:_____ **Grade 1-**_____

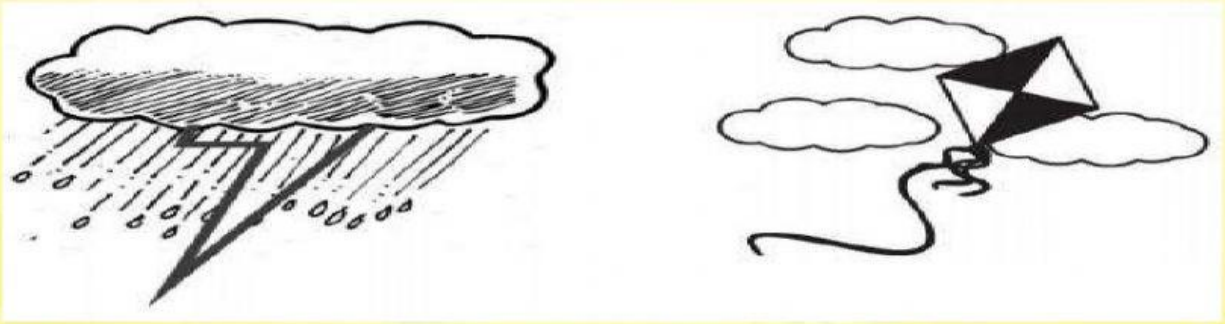

Science I/Quarter 3/Week 5

Sounds All Around

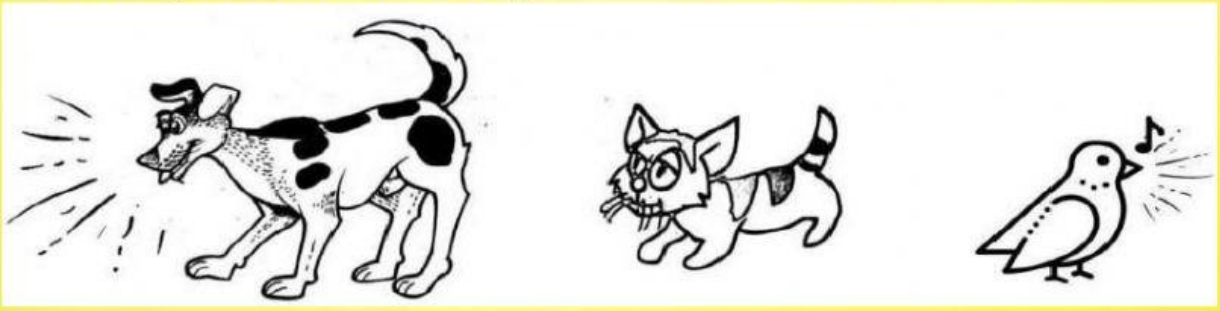

This Learning Activity Sheet is about:

1. Identify the devices (objects) that produce sounds;
2. Draw simple devices (objects) that produce sounds; and
3. Appreciate sounds you can hear around.

Sounds are everywhere. Some sounds may come from nature like thunderstorms, falling rain, and strong wind.

Others may come from animals like cat's purr, dog's bark, bird's chirp and horse's neigh.

Still, others may come from sounds made by people talking, laughing, singing and shouting (Ramos, 2010)

LIVEWORKSHEETS

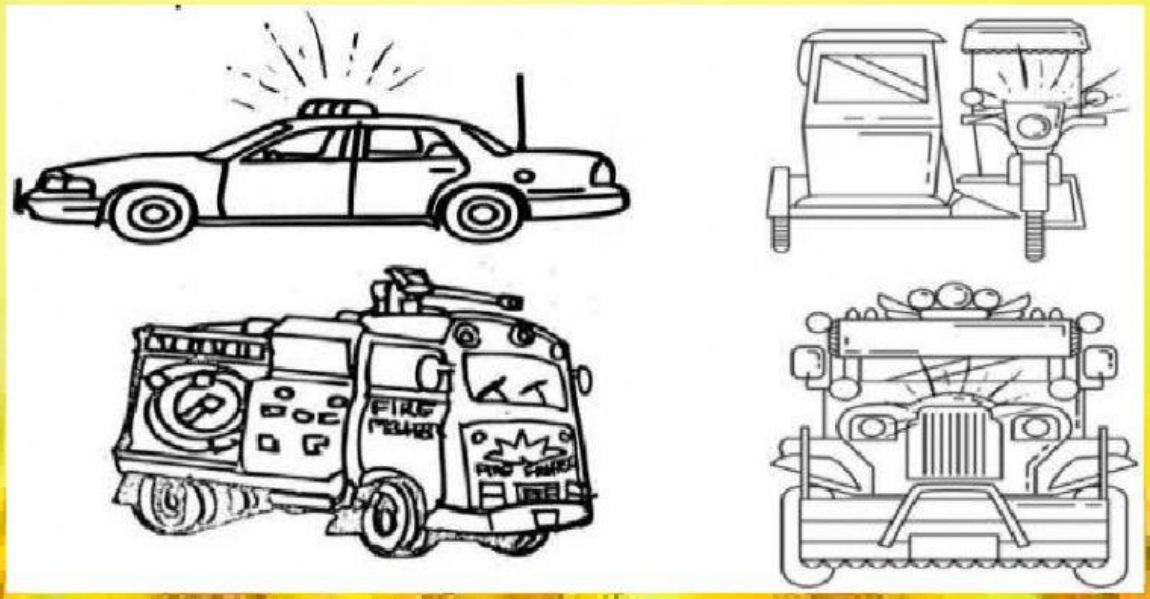

Reno, Felicidad N. Makabayan Tayo p.86

People and animals make sounds. Objects can make sounds too. Can you name them?

Espada,Ma.Liza T(2009).Discover and Explore Science,page 179

There are many sounds around you. Each object can produce sound when it vibrates. Vibration is a rapid backand-forth movement of particles of medium such as air, water, and wood. On the streets, many things produce sounds. You can hear the horns of cars, tricycles, and jeeps. You can hear the siren of the ambulance and the fire truck. Vehicles produce different sounds.

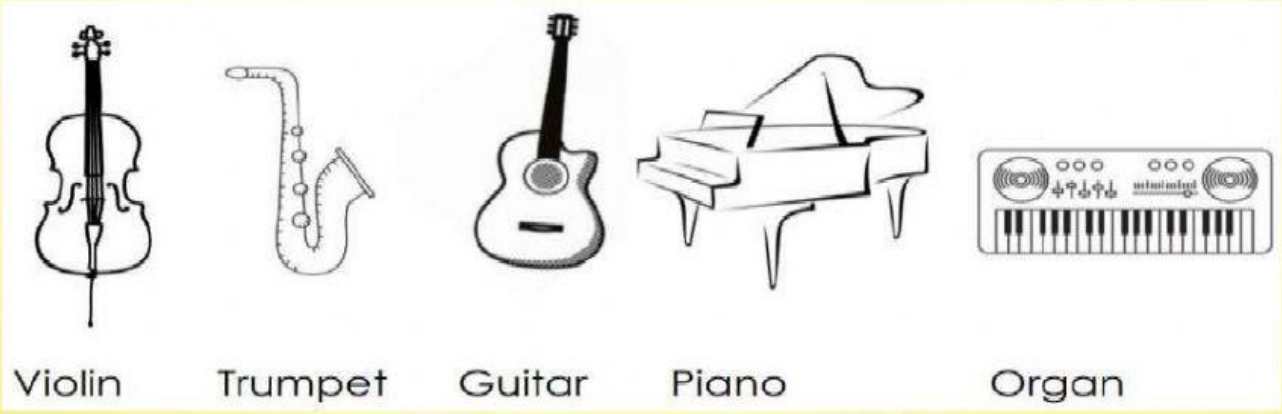

LIVEWORKSHEETS

At home, some things produce sounds. The alarm clock makes a loud sound when it wakes you up in the morning. The television, radio, and telephone also make sounds.

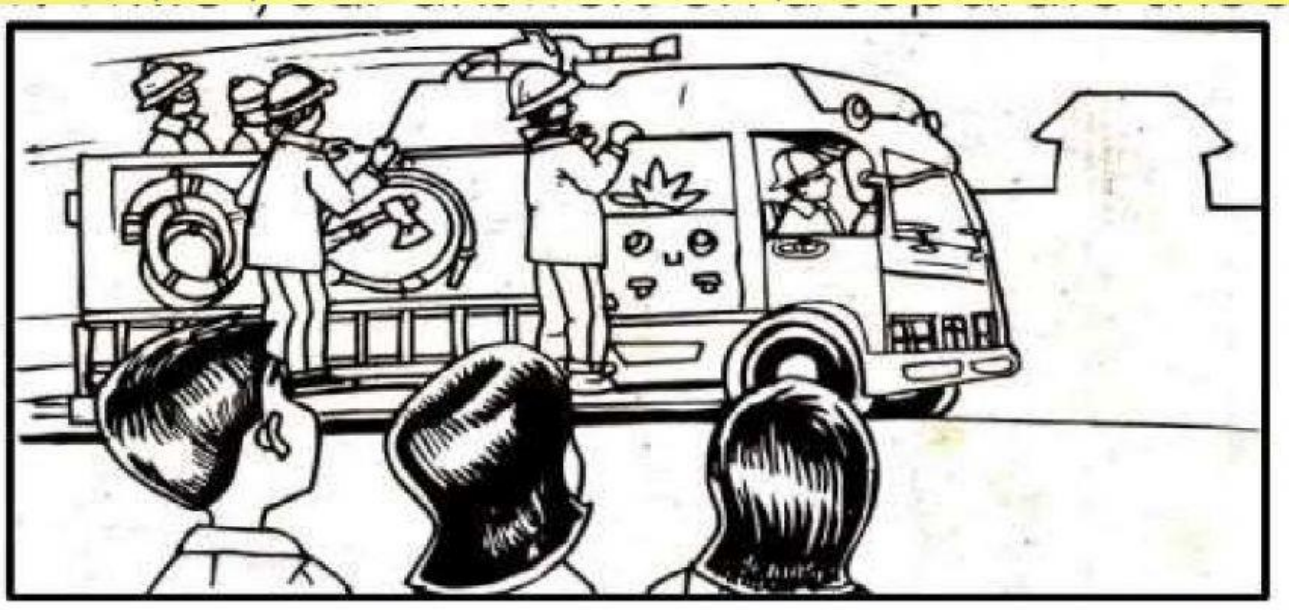

Musical instruments produce different sounds. Here are some examples of musical instruments (Ramos, 2010).

BUILD UP: PERFORMANCE TASK #4 (Video Presentation)

Study the picture below and answer the questions that follow.

Source: Espada,Ma.Liza T(2009).Discover and Explore Science,page

LIVEWORKSHEETS

1. What object or device can produce sound in this picture?

2. What is the sound of the vehicle?

3. Is the sound produced by the fire truck loud or soft?

4. Where can we usually hear the sound of the fire truck?

5. Why do you think the siren of the fire truck needs to be loud?

I. Direction: Look at each picture carefully. Describe the sounds produced by different objects. Put a (√) mark if it is a correct sound or (x) if it is NOT. Write your answer inside the box.

☐ 1. 

tok-tok-tok-tok

☐ 2. 

brroom-brroom

☐ 3. 

ting-ting-ting

☐ 4. 

ding-dong -ding-dong

☐ 5. 

wheeeng-wheeeeeng

LIVEWORKSHEETS

II. Direction: Choose the letter of the correct answer. Write your answer inside the box.

1. What device or instrument is used by doctors to hear the sound of a heartbeat?

A.  magnifying glass

B.  microscope

C.  stethoscope.

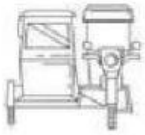

D.  telescope

2. What vehicle is specially designed for taking sick or injured people to and from the hospital and you can hear its siren when there is an emergency?

A.  ambulance

B.  bicycle

C.  fire truck

D.  tricycle

3. Which of the following devices does NOT belong to the group of objects that produce sound and cannot be used for communications?

A.  cellphone

B.  lamp shade

C.  megaphone

D.  telephone

LIVEWORKSHEETS

4. All these objects produce sounds. Which of the following is NOT a musical instrument?

A.  drum

B.  flute

C  trumpet

D.  whistle

5. What device is used by the man to watch and hear the latest news?

A. computer
B. laptop
C. radio
D. television
