

Elephants are interesting animals because they are very sociable and family is important to them. They can grow to a \_\_\_\_\_ of over 3 metres and usually \_\_\_\_\_ about 3,800 kilos. Normally they are quite relaxed and \_\_\_\_\_ animals, but sometimes they can get \_\_\_\_\_ when they are looking after \_\_\_\_\_ elephants. They are also quite clever and \_\_\_\_\_, and slow down and help feed \_\_\_\_\_ or ill members of the family group. These qualities and the fact that they are so strong and \_\_\_\_\_ is why people want to protect them and the land they live on for the future.
