## **Exercise 21: Living Things can Move**

Living things can move.

Animals can move in many ways. They can **fly**, **crawl**, **swim**, **jump** and **run**.

Plants can move by closing itself when touched or eat.

*Match the pictures with the correct word to describe how animal move.*

|                                                                                                      |       |
|------------------------------------------------------------------------------------------------------|-------|
| <br>Eagle           | Crawl |
| <br>crocodile       | Run   |
| <br>horse          | Swim  |
| <br>frog          | Close |
| <br>orca          | Jump  |
| <br>Venus flytrap | Fly   |
