LKPD Trigonometri Sudut Berelasi-Part 3

Ayo Mengamati

Perhatikan gambar berikut ini!

Ayo Mengumpulkan Informasi

Definisi 1

$$\sin \alpha = \frac{y}{r}$$

$$\cos \alpha = \frac{x}{r}$$

$$\tan \alpha = \frac{y}{x}$$

$$\cot \alpha = \frac{x}{y}$$

$$\sec \alpha = \frac{r}{x}$$

$$\csc \alpha = \frac{r}{y}$$

By Pungky Rahmawati, S.Pd

Berdasarkan gambar 1 dan definisi 1, tentukan kesimpulan dari nilai trigonometri pada masing-masing kuadran:

Nilai Trigonometri pada Kuadran I

$$\begin{array}{ll} \sin(90^\circ - \alpha) = \frac{x}{r} = \cos \alpha & \cot(90^\circ - \alpha) = \frac{y}{x} = \tan \alpha \\ \cos(90^\circ - \alpha) = \frac{y}{r} = \sin \alpha & \sec(90^\circ - \alpha) = \frac{r}{x} = \csc \alpha \\ \tan(90^\circ - \alpha) = \frac{y}{x} = \cot \alpha & \csc(90^\circ - \alpha) = \frac{r}{y} = \sec \alpha \end{array}$$

Nilai Trigonometri pada Kuadran II

$$\begin{array}{ll} \sin(90^\circ + a) = \cos a & \cot(90^\circ + a) = -\tan a \\ \cos(90^\circ + a) = -\sin a & \sec(90^\circ + a) = -\csc a \\ \tan(90^\circ + a) = \cot a & \csc(90^\circ + a) = \sec a \end{array}$$

Nilai trigonometri pada kuadran III

$$\begin{array}{ll} \sin(270^\circ - a) = -\cos a & \cot(270^\circ - a) = \tan a \\ \cos(270^\circ - a) = \sin a & \sec(270^\circ - a) = \csc a \\ \tan(270^\circ - a) = -\cot a & \csc(270^\circ - a) = -\sec a \end{array}$$

Nilai trigonometri pada kuadran IV

$$\begin{array}{ll} \sin(270^\circ + a) = -\cos a & \cot(270^\circ + a) = -\tan a \\ \cos(270^\circ + a) = \sin a & \sec(270^\circ + a) = \csc a \\ \tan(270^\circ + a) = \cot a & \csc(270^\circ + a) = -\sec a \end{array}$$
