No gain without pain

Pain is necessary. It is _____ body's way of telling us that something is wrong. However _____ scientists do not understand how pain works. People experience _____ pain in different ways. It depends on _____ different biological factors.

There is _____ very rare condition where the sufferer doesn't feel any pain. Doctors have only found 33 people with this condition. In one case _____ young child broke his ankle and continued

to play and run. One possible cause may be a lack of 'betaendorphin', _____ chemical which is responsible for controlling _____ pain.

_____ pain stops us from doing things that can hurt us like putting our hand in _____ fire, or burning ourselves with _____ boiling water. It also means that we do something to protect _____ injured part of our body. For example, we are careful to avoid putting weight on _____ injured ankle. This child mentioned above will keep hitting his head but it doesn't hurt him. On the other hand, _____ normal children learn to be careful because their mistakes are painful.

4. Translate the text to English. Be mindful of the articles.

Има фантастичен турски ресторант в нашия град. Собствениците са двойка от Истанбул. Те живеят във Великобритания сега. Айла, жената, е архитект, но работи в ресторанта вечерта. Окан, нейният съпруг, работи само в ресторанта. Те имат турски готвач - Кемал, и английски писател - Джо. Те имат много добро меню с много блюда. Ходим там един или два пъти в месеца за наистина вкусно хапване.
