

## EQUIVALENZE

Usa la tabella per svolgere correttamente gli esercizi.

|    |                   |                   |                   |                   |                   |                   |
|----|-------------------|-------------------|-------------------|-------------------|-------------------|-------------------|
| km | hm                | dam               | m                 | dm                | cm                | mm                |
|    | $\curvearrowleft$ | $\curvearrowleft$ | $\curvearrowleft$ | $\curvearrowleft$ | $\curvearrowleft$ | $\curvearrowleft$ |
|    | :10               | :10               | :10               | :10               | :10               | :10               |

### RICORDA

Per passare da una unità di misura di valore minore a una di valore maggiore **dividi** la misura data per 10, 100, 1 000. Quando le cifre non bastano aggiungi gli zeri.

$$14 \text{ dm} \xrightarrow{:10} 1,4 \text{ m}$$

$$800 \text{ mm} \xrightarrow{\quad} \text{ m}$$

$$0,3 \text{ cm} \xrightarrow{\quad} \text{ dm}$$

$$120 \text{ dam} \xrightarrow{\quad} \text{ hm}$$

$$7 \text{ mm} \xrightarrow{\quad} \text{ m}$$

$$85 \text{ m} \xrightarrow{\quad} \text{ dam}$$

$$390 \text{ cm} \xrightarrow{\quad} \text{ m}$$

$$31,6 \text{ hm} \xrightarrow{\quad} \text{ km}$$

$$15,3 \text{ cm} \xrightarrow{\quad} \text{ dm}$$

$$445 \text{ mm} \xrightarrow{\quad} \text{ dm}$$

$$6 \text{ dm} \xrightarrow{\quad} \text{ m}$$

$$387 \text{ m} \xrightarrow{\quad} \text{ hm}$$
