

## SCIENCE CHECKPOINT TEST 4

### Question 1

This question is about forces.

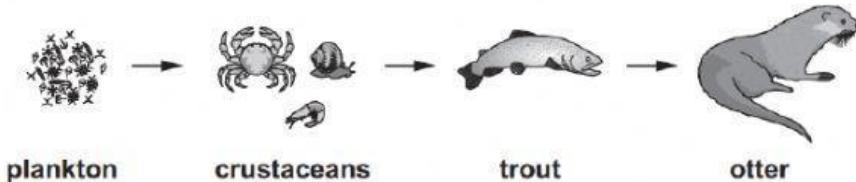

Which of the following are examples of forces?

Tick (✓) the **three** correct boxes.

a beam of light from a torch	<input type="checkbox"/>
a girl unscrewing a jar	<input type="checkbox"/>
a horse pulling a cart	<input type="checkbox"/>
a man pushing a trolley	<input type="checkbox"/>
the sound of a drum	<input type="checkbox"/>

### Question 2

Here is a food chain.

Complete the sentences.

All food chains begin with a ..... .

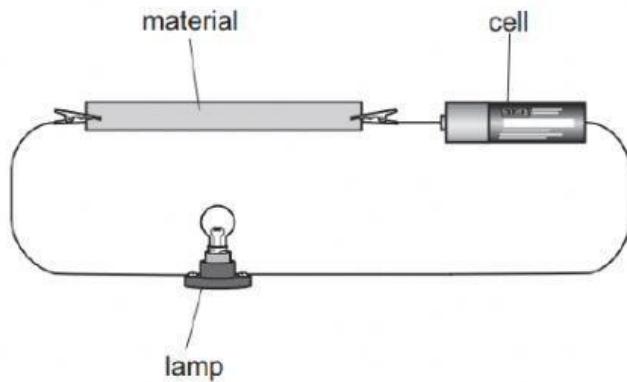

In this food chain this is the ..... .

This living organism gets its energy from the ..... .

### Question 3.

Priya investigates electrical conductors.

She uses different materials in an electrical circuit.

Which material is a good conductor of electricity?

Circle the correct answer.

**copper**

**glass**

**plastic**

**wood**

Which material is **not** a good conductor of electricity?

Circle the correct answer.

**brass**

**gold**

**rubber**

**silver**

#### Question 4.

Insects pollinate flowers.

(a) Circle **one** statement that is **true** about the flowers pollinated by insects.

**flowers can be bright colours**

**flowers close at night**

**leaves are large**

**petals are always small**

**stems bend easily**

#### Question 5.

This question is about sound.

(a) Decide if these sentences are true or false.

Tick (✓) the correct box next to each sentence.

When a string of a guitar vibrates a sound is produced.

<b>true</b>	<b>false</b>
<input type="checkbox"/>	<input type="checkbox"/>

A unit of loudness of sound is the decibel.

<input type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------

(b) Decide if these sentences are true or false.

Tick (✓) the correct box next to each sentence.

Sound travels at the same speed in all solid materials.

<b>true</b>	<b>false</b>
<input type="checkbox"/>	<input type="checkbox"/>

The speed of sound in space is the same as the speed of sound in air.

<input type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------

## Question 6.

Mixtures can often be separated.

This is a list of ways of separating mixtures.

**filtration**

**evaporation**

**magnetic attraction**

**sieving**

(a) Use the words from this list to complete the table.

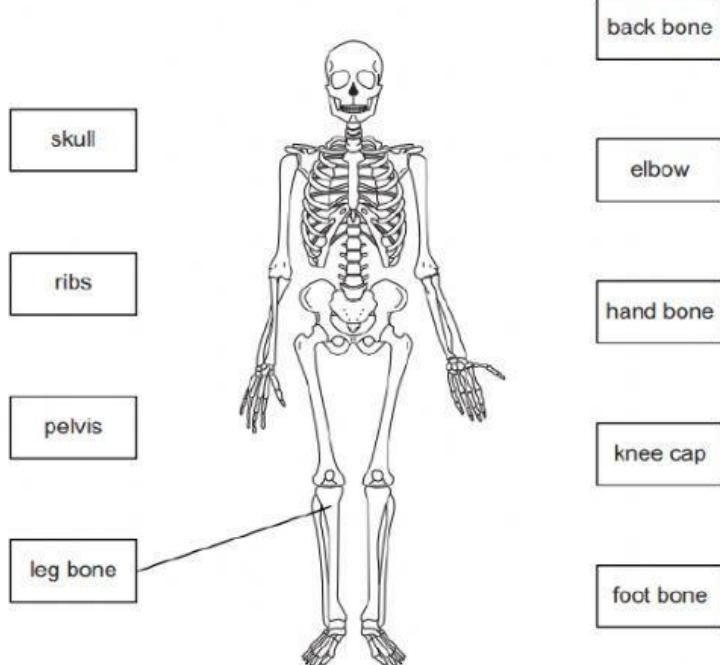

<b>mixture</b>	<b>method of separation</b>
salt and water	
steel powder and lumps of steel	
sand and water	
steel powder and copper powder	

## Question 7.

Humans have bony skeletons inside their bodies.

Draw a line from each label to the correct part of the body.

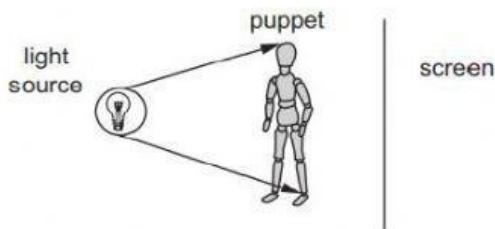

One has been done for you.

### Question 8.

Mike is in a dark room.

He puts a puppet between a light source and a screen.

**(a)** Light travels from the light source.

Light is blocked by the puppet.

A dark area appears on the screen.

What is the name of this dark area?

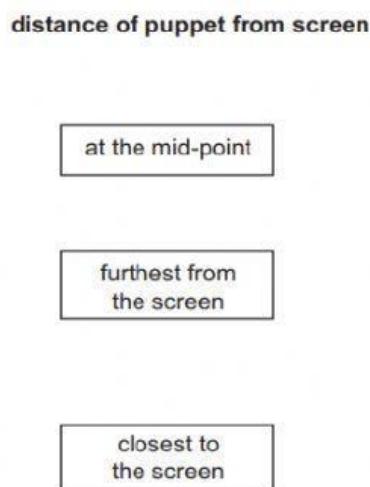

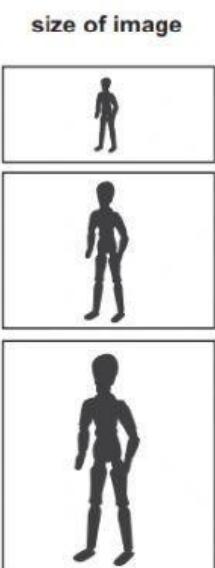

.....

**(b)** Mike moves the puppet.

He does **not** move the light source.

He does **not** move the screen.

Draw lines from the **size of image** to the correct **distance of puppet from screen**.

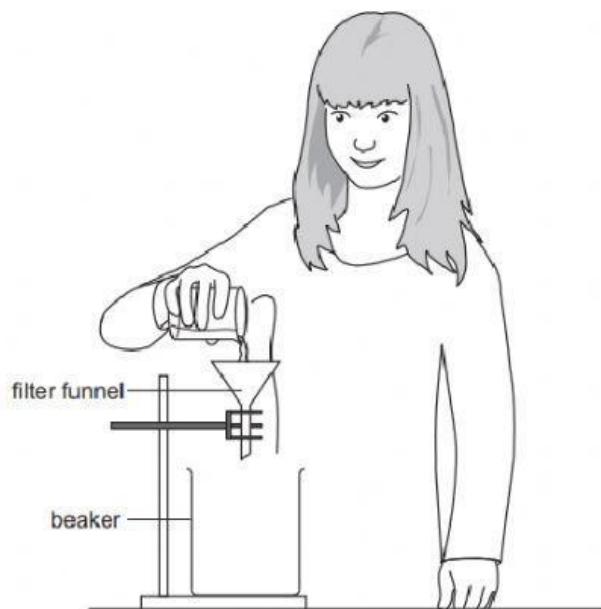

### Question 9.

Gabriela investigates how a water clock works.

- She **accurately** measures a volume of water.
- She pours the water into a filter funnel.
- She times how long it takes for the water to pass through.

She repeats this with different **volumes** of water.

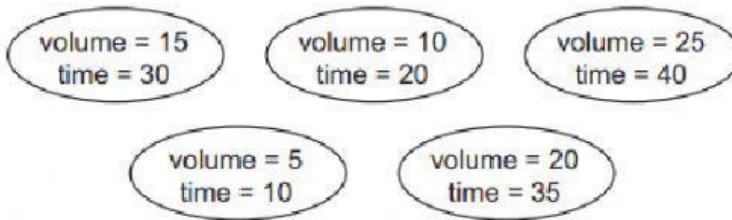

(a) Which apparatus does she use to measure **accurately** the volume of water?

Tick the correct apparatus

**(b)** Here are her results.

Put her results in the table in the correct order.

volume of water	time taken

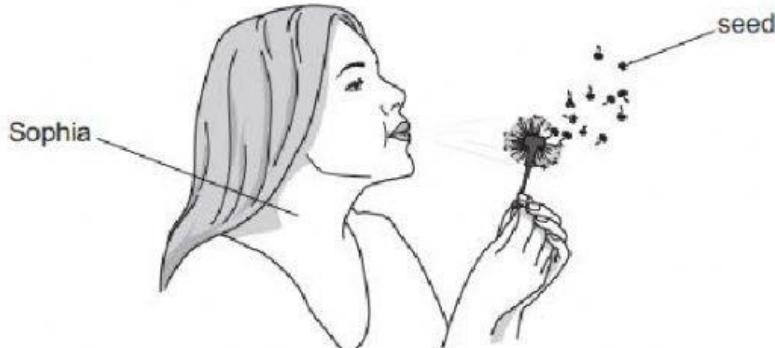

**(c)** What did she forget to add to the headings in the table?

---

### Question 10.

Seeds are dispersed.

(a) Sophia disperses seeds.

What kind of seed dispersal is Sophia using?

Circle the correct answer.

**animal dispersal**

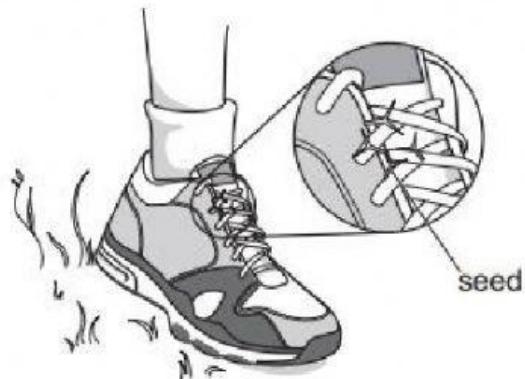

**insect dispersal**

**self-dispersal**

**water dispersal**

**wind dispersal**

Chen disperses seeds.

What kind of seed dispersal is Chen using?

Circle the correct answer.

- animal dispersal**
- insect dispersal**
- self-dispersal**
- water dispersal**
- wind dispersal**
