

The Blue- Green Planet

The most exciting day of my life was beginning. We were about to land on the famous blue-green planet we had dreamed of for so long. This is the third planet from the Sun and it goes round the sun is 365 days. We splashed down in a small lake and swam quickly to the shore

. Strange creatures were walking by the side of the lake. Some of them had even stranger short creatures, which had tails, running along beside them. When the taller creatures saw us, they screamed and yelled and chased us away. We ran for our lives. Before long, more of the same creatures in noisy machines came after us.

Little objects whizzed through the air towards us. Luckily, they bounced off our tough skins.

After that, we hid away and watched what was going on from our hiding places. Luckily, we had a supply of

crystals with us or we would have starved. We went all about the blue-green planet and saw many odd things. In some places, creatures were growing and building things. In other places, they were destroying and killing one another. It did not make much sense to us and we decided we were better off on our own peaceful planet. We crept back to our spacecraft under the cover of darkness and thankfully headed home.

Answer the following questions. Write your answers in complete sentences.

1. Which planet do you think the spacecraft landed on? How do you know?

2. Who do you think the strange creatures without tails were? Explain your answer.

4. Why did the creatures from the spacecraft want to leave this new planet?

5. Name some activities the creatures did in the passages
