## Good Touch and Bad Touch

A good touch is when someone touches you in a way that is nice, friendly and safe. Example: a hug or a handshake. A bad touch is when someone touches you in a way that makes you feel bad or uncomfortable. Example: a slap, a kick, or if they touch the private parts of your body.

Look at the pictures below. Draw a line from the pictures that show a good touch to the happy face and a line from the pictures that show a bad touch the sad face.

Click on all the parts of the body where no one should touch.
