

Laboratorio di aritmetica

c.d.2020

Trasforma le addizioni in moltiplicazioni e calcola seguendo l'esempio

$$2+2+2+2 = \underline{\quad 2 \times 4 \quad} \overset{\text{flower}}{=} 8$$

$$4+4+4 = \underline{\quad} \overset{\text{flower}}{=} \underline{\quad}$$

$$5+5+5+5+5 = \underline{\quad} \overset{\text{flower}}{=} \underline{\quad}$$

$$7+7+7+7 = \underline{\quad} \overset{\text{flower}}{=} \underline{\quad}$$

$$3+3+3+3+3+3+3 = \underline{\quad} \overset{\text{flower}}{=} \underline{\quad}$$

$$8+8+8+8+8 = \underline{\quad} \overset{\text{flower}}{=} \underline{\quad}$$

$$6+6+6 = \underline{\quad} \overset{\text{flower}}{=} \underline{\quad}$$

Trasforma in moltiplicazione dove è possibile

$$6+6+6 = \underline{\hspace{2cm}} \overset{\text{🌸}}{=} \underline{\hspace{2cm}}$$

$$4+3+4 = \underline{\hspace{2cm}} \overset{\text{🌻}}{=} \underline{\hspace{2cm}}$$

$$9+9+9 = \underline{\hspace{2cm}} \overset{\text{🌻}}{=} \underline{\hspace{2cm}}$$

$$4+2+5 = \underline{\hspace{2cm}} \overset{\text{🌻}}{=} \underline{\hspace{2cm}}$$

$$7+7+7+7 = \underline{\hspace{2cm}} \overset{\text{🌸}}{=} \underline{\hspace{2cm}}$$

$$3+3+3+3+3 = \underline{\hspace{2cm}} \overset{\text{🌸}}{=} \underline{\hspace{2cm}}$$
