UNIT 9: FRACTIONS

Lesson 3: Like fractions. Unlike fractions

I. Basic knowledge

1. Like and unlike fractions

- Like and unlike fractions are the two groups of fractions:

  Group 1: $\frac{1}{5}, \frac{2}{5}, \frac{3}{5}, \frac{4}{5}$.

  Group 2: $\frac{1}{5}, \frac{2}{3}, \frac{3}{4}, \frac{4}{7}$.

- In group 1, the denominator of each fraction is 5, i.e., the denominators of the fractions are equal.

  The fractions with the ***same denominator*** are called **like fractions**.

- In group 2, the denominator of each fraction is different, i.e., the denominators of all the fractions are different.

  The fractions with the ***different denominators*** are called **unlike fractions**.
