Grade 5 Term 3 Week 1
Soil formation Lesson 1

Drag the statements below to the correct boxes to show the order in which soil is formed.

The small rocks get weathered more and more until they are very small particles

The particles get mixed in with decomposing plant and animals, broken down minerals, water, and air

A parent rock is weathered, or broken down, by wind, water, ice, plants, or animals

The broken pieces are weathered more and more until they become gravel, or small rocks
