

How to describe your symptoms

Watch the video and tick the symptoms the patient mentioned

high fever
sore throat
sore stomach
dizzy

feeling tired
vomiting
diarrhoea
runny nose

Match the symptoms to the correct advice

1. I have a dry cough
2. I have a sore throat. It's very painful when I swallow
3. I have an eye infection
4. I'm stressed-out and I can't sleep
5. I have backache

You should take some sleeping pills/
tablets

If I were you, I would stop smoking

You have to take some painkillers

You should visit a doctor. You need
some eye drops

Why don't you take some syrup?

Fill in the gaps with the missing word

At the doctor's

- What's the
- Doctor, I'm a little under the weather. I've got high and my head is feeling as as a stone.
- When did the temperature start?
- Yesterday evening
- Have you got any other symptoms, like throat or nose?
- Oh, yes! I've got a little of sore throat.
- I see. You've probably got a You should stay warm, preferably in bed. Drink a lot of water and if the fever persists take an aspirin. I'm sure you'll get in a couple of days.
- Thank you doctor. I'll let you know how it goes. Have a nice day.
