Psychological Trauma at School

They treat me differently, bad different. I was locked in the bathroom, they told me to buy lunch and the worst thing was they ever told me to do all their assignments until mine had not been done. even though the incident of bullying was almost 10 years ago. My friends are rich kids. I was bullied by my friends at school. I went to a psychiatrist to treat my trauma and fear because I had a panic attack. This is because I am the son of a baker. As a result of their actions, I experienced psychological trauma. I became afraid to meet other people.
